Use GUESS and circle your final answers.
Be sure your answer is rounded to the correct number of significant figures and includes a measurement unit.

1-1 A plane in sitting on a runway awaiting takeoff. On an adjacent runway, another plane lands and passes the stationary plane at a speed of $45 \mathrm{~m} / \mathrm{s}$. The arriving plane has a length of 36 m . By looking out the window (very narrow) of the stationary plane, you can see the moving plane. For how long is the moving plane visible to you?

1-2 The three-toed sloth is the slowest moving land mammal. On the ground, the sloth moves at an average speed of $0.037 \mathrm{~m} / \mathrm{s}$, considerably slower than the giant tortoise, which walks at $0.076 \mathrm{~m} / \mathrm{s}$. After 12 minutes ( 720 s ) of walking, how much further would the tortoise have gone relative to the sloth?

2-1 For a standard production car, the highest road-tested acceleration ever reported occurred in 1993, when a Ford RS2000 Evolution went from zero to $26.8 \mathrm{~m} / \mathrm{s}(60 \mathrm{mi} / \mathrm{h})$ in 3.275 s . Find the magnitude of the car's acceleration. ("Magnitude" just means the value of the acceleration disregarding direction.)

2-2 A runner accelerates to a velocity of $5.36 \mathrm{~m} / \mathrm{s}$ due west in 3.00 s . His average acceleration is $0.640 \mathrm{~m} / \mathrm{s}^{2}$, also directed due west. What was his velocity when he began accelerating?

3-1 A truck, traveling at a velocity of $33 \mathrm{~m} / \mathrm{s}$ due east, comes to a stop by accelerating at $11 \mathrm{~m} / \mathrm{s}^{2}$ west (let east be + and west be - ). How far does the truck travel in the process of stopping? (Watch your signs!)

3-2 The length of the barrel of a primitive blowgun is 1.2 m . Upon leaving the barrel, a dart has a speed of $14 \mathrm{~m} / \mathrm{s}$. Assuming that the dart is uniformly accelerated, how long does it take for the dart to travel the length of the barrel? (Hint: The dart's original velocity is zero. What is it's average velocity?)
